Tool Holder

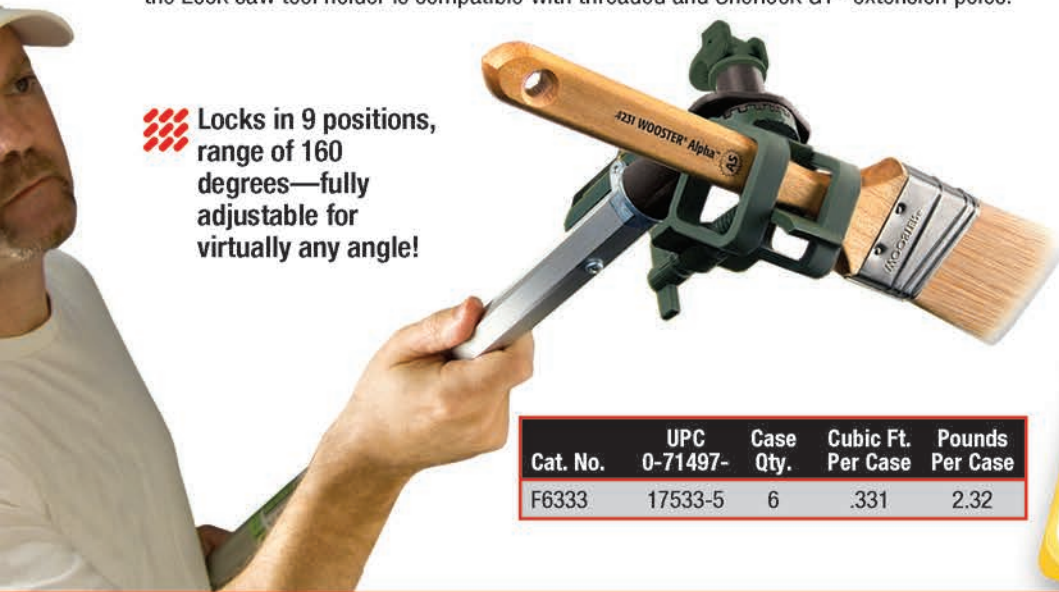

LOCK JAW™

Brushes • Trim Rollers • Flashlights • Scrapers • Roller Frames • Sanders • Dusters

Sometimes an extension pole is not enough. The Wooster Lock Jaw tool holder is the key to securing tools in place and reaching that extra distance. The improved patent-pending design adjusts in 20-degree increments to cover all planes of a surface. With the flip of a lever, the Lock Jaw withstands pressure from use and prevents slippage to keep tools in position. It holds a maximum diameter of 1 3/8-inches, and is perfect for attaching tools without threads and working at odd angles. Made of durable, engineering-grade plastics, the Lock Jaw tool holder is compatible with threaded and Sherlock GT® extension poles.

 Locks in 9 positions, range of 160 degrees—fully adjustable for virtually any angle!
