

WOOSTER®

TRIANGULAR TOOLS GET SURFACES INTO SHAPE

AeroSander™

Large-surface drywall prep is a smoother task with the AeroSander, Wooster's high-production sanding tool. Its 9½-inch triangular shape works quickly and reaches into corners with complete control. Use it with all extension poles, including Sherlock GT®.

Our high-performance sandpaper works 30% faster than conventional sandpaper. AeroSander sandpaper is highly resistant to tearing, curling, or clogging. Choose 80-, 120-, and 220-grit triangular sandpaper 6-packs to achieve the ideal smoothness for any project.

The sandpaper easily connects and stays securely attached to the AeroSander base, thanks to the VELCRO® brand hook-and-loop fastener.

The 360-degree pivot joint allows full surface contact without catching, gouging, or rolling over.

AeroDuster™

Featuring specially treated yarn that captures dust, cobwebs, pet hair, and fine particles, the AeroDuster is great for ceilings, walls, and floors. The 9½-inch triangular shape is large enough to work quickly, but small enough to maneuver above doorways, under tables, and into corners. The AeroDuster utilizes a strong VELCRO® brand hook-and-loop fastener to remain securely attached to the AeroSander base whenever the two are pressed together. Shake it out to reuse again and again—no wetting or washing required.

DUST EATER™

As the original tool that the AeroDuster™ was based on, the Dust Eater is an ideal choice for larger cleanup jobs. Its specially treated yarn is double-sewn into a flexible vinyl backing and gobbles up drywall dust on walls, ceilings, baseboards, and floors. The 16-inch triangular shape quickly covers surfaces and still reaches into corners. It also has a stable 360-degree pivot and won't flip or roll over. Use the Dust Eater with no-twist Sherlock GT® extension poles, or any standard threaded handle. The reusable zip-seal package keeps the Dust Eater clean during storage.

DUST EATER REFILL

After extended use, the cleaning power of the Dust Eater may be renewed using the Dust Eater Refill. The drawstrings make it easy to attach to the original Dust Eater base. When the job is done simply shake out the Dust Eater, no wetting or washing required.

Description	Cat. No.	UPC 0-71497-	Case Qty.	Cubic Ft. Per Case	Pounds Per Case
