## SOFT & FURRY...

Appearances can be deceiving. Polar Bear has innovative, furry fabric that looks and paints like no other roller cover on the market. With a smooth, steady stroke, the silky fibers grip the surface and reach into textures to deliver complete coverage without dripping or spatter—perfect when working overhead. The Polar Bear is great for ceilings, knockdown plaster, stucco, and cinder or cement block. It puts down a very smooth finish on drywall, too! The soft, open fibers make it easy to clean.

## ...BUT VORACIOUS

Our Polar Bear has a huge appetite for paint. The extra-absorbent, professional fabric picks up and releases a lot more coating, so you can keep rolling without repeatedly going to the bucket to reload.

If you paint 10 square feet with a regular roller, you'll cover 15 square feet with the Polar Bear! It doesn't leave a fat edge like many other rollers, so it eliminates tracking lines. It has long life, and performs consistently day after day. Polar Bear devours time-consuming jobs.

## polar bear

- Proprietary white plush fabric for huge paint pickup and release with all flat, eggshell or satin paints, stains, and primers
- Reaches into textures or uneven areas, provides a smooth finish
- Green™ double-thick polypropylene core resists water, solvents, and cracking
