GENERATIONS OF INNOVATION

GENERATIONS OF INNOVATION

For 175 years, generations of employees at The Wooster Brush Company have built upon a proud tradition of quality, craftsmanship, and integrity.

We celebrate this milestone by honoring our heritage and looking ahead, with the same passion for innovation that has defined us for 175 years.

1851

The Wooster Brush Company is founded

Adam Foss purchases hog bristles from an unclaimed freight auction in Cincinnati and transports them to Wooster, Ohio. Together, he and his brother Samuel began crafting paintbrushes from the bristles and selling them door-to-door.

Ten years before the start of the Civil War, a legacy of craftsmanship begins.

Adam Foss, Founder

1926

FOSS-SET Cement

Developed to permanently hold bristles in Wooster brushes, FOSS-SET cement demonstrates its strength and durability through "Ted the Tester" hanging from the bristles.

1951

Roller Covers

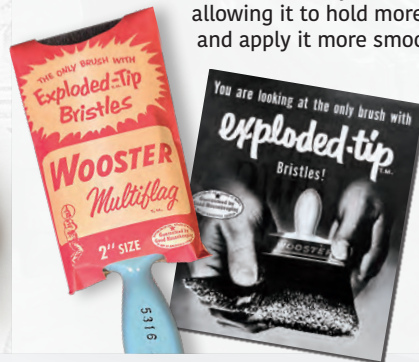

Expanding its product offering to meet the growing demand of DIY painting, Wooster begins manufacturing roller covers. These products allow for efficient coverage on large, flat surfaces.

1954

Exploded-Tip™ Brushes

By mimicking the soft, flagged tips of natural bristle, Wooster develops a process that increases the surface area of synthetic filament, allowing it to hold more paint and apply it more smoothly.

1964

Super/Fab® Synthetic Roller Covers

Wooster achieves another industry first by pioneering synthetic fabrics for roller covers.

A significant innovation providing superior paint capacity for the fastest coverage, they're now an industry standard.

1999

Shortcut® Brush

Revolutionizing painting with a soft-grip, flexible rubber handle, the Shortcut® provides superior ergonomics, comfort & control. Its short handle fits easily into tight spaces and makes trim work and cutting in easier than ever before.

2002

Jumbo-Koter® Mini Rollers

Perfect for corners and small areas, the jumbo mini system uses the same fabrics as full-size rollers to deliver better coverage and consistent finishes.

2019

Redder is Better

Wooster refreshes its brand with a bold new look. Packaging communicates key features and benefits, and the new logo incorporates a paintbrush into the mark—honoring the company's historic invention.

1937

Angle Paintbrushes

Wooster invents the angle paintbrush.

Designed to provide extra control and improve ergonomics, it's now the best-selling style in the U.S.A.

1941

Nylon Filament

During World War II, the U.S. Government halts trade with China—preventing imports of hog bristle, a vital paintbrush component.

Wooster quickly engineered a solution using synthetic nylon filament from DuPont® and supplied brushes to the U.S. Military.

After the war, these tools—the model for what is the modern paintbrush—were introduced to the public.

1985

Ultra/Pro® Brushes

Wooster debuts its flagship line of paintbrushes, delivering the most versatile performance across three unique blends.

1988

Sherlock® Extension Poles

Engineered to lock securely in place and built with a rigid, hexagonal inner pole, Sherlock® poles quickly become the preferred choice of professionals.

1992

Sherlock® Roller Frame

The Sherlock® frame is unveiled. It locks rollers in place and features smooth-rolling bearings & hands-free release. It's still the most durable, most trusted frame on the market.

2020

Hook & Hold® Brushes

Featuring a convenient, built-in swivel hook for hanging the brush on a paint can, tray, or bucket, Hook & Hold® allows you to keep your brush out of the paint and right where you need it.

2022

GripTech® Brushes

Integrating a rubberized grip on each side of the handle for increased ergonomics and control, the GripTech® line of paintbrushes delivers excellent cut-in ability and smooth finishes in all paints.

2024

GripTech MAX® Brushes

Wooster launches GripTech MAX®, an innovative handle technology featuring a rubberized soft-grip texture extending up and around the handle, providing maximum grip and reduced slip—available on Ultra/Pro® Firm and Silver Tip® brush lines.
